

FIELD VERIFICATION MODULE

Complete and accurate record of participant contact

The Field Verification module for SentinelDNA allows field officers to efficiently verify and document interactions with program participants anytime and anywhere.

Using the SentinelDNA Mobile App, the officer scans the participant's GPS device to capture all pertinent information. The identity of the participant and officer are linked to the contact and the data is transmitted to SentinelDNA to become part of the permanent case file. Benefits include:

- **Simplicity:** Field officers quickly capture and document all pertinent information during field contact with a participant using their smartphone.
- **Convenience:** The participant's SentinelDNA record is automatically updated without after-the-fact manual entry of information.
- **Accountability:** Supervisors can ensure field contact with participants is documented and performed according to agency standards.

Verify field contact with participants using an iPhone or Android.

CAPTURES ESSENTIAL DATA

Field officers simply scan the participant's GPS device and all pertinent information is recorded, ad hoc notes can be added and data is electronically transmitted to SentinelDNA.

- **Who:** identity of program participant
- **Where:** location of the contact
- **When:** date and time contact took place
- **Field notes:** ad hoc notes and comments by officer
- **Agency-specific data:** user definable information
- **Part of the permanent record:** verified field contact with the participant becomes part of their historical record in SentinelDNA

FIELD VERIFICATION DATA ATTACHED TO CASE FILE

The Field Verification module for SentinelDNA provides proof of the date, time, and location of participant contact.
